New Turkey installation from Polin

AQUA Toy City waterpark at the Ilica Spa and Wellness Resort in Cesme, Turkey, opened its doors recently, complete with numerous attractions developed and installed by Polin Waterparks and Pool Systems.

Aqua Toy City offers a wide range of attractions to its guests of all ages, including waterslides, a children's water playground, swimming pools and a leisure pool located on a 4,500sq.m area.

Polin supplied all the waterslides to the complex, including a Black Hole slide with natural light effects; a multi-lane racer slide, Multislide; a Compact Slide with flexible design configuration; and a Giraffe Shower.

All Polin supplied waterslides were manufactured using closed moulded Resin Transfer Moulding technology, offering a superior shiny finish on both sides.

Yakup Demir, general manager of Ilica Hotel Spa and Wellness Resort, said: "In the last five years, Cesme has grown into an exceptional place with its beautiful beaches, clubs and gum-scented blue sea. We observed the need for a waterpark and invested US\$5m to build the Aqua Toy City.

"This has not only highlighted our own facility and enhanced our revenues but added value both economically and socially to the Cesme region in general," he added.
